## OPPORTUNITIES FOR BIOLOGICAL NITROGEN FIXATION IN RICE AND OTHER NON-LEGUMES

Papers presented at the Second Working Group Meeting of the Frontier Project on Nitrogen Fixation in Rice held at the National Institute for Biotechnology and Genetic Engineering (NIBGE) Faisalabad, Pakistan, 13–15 October 1996

Guest Editors: J.K. Ladha, F.J. de Bruijn and K.A. Malik

**Preface** vii

**Introduction: Assessing opportunities for nitrogen fixation in rice – a frontier project**
J.K. Ladha, F.J. de Bruijn and K.A. Malik 1–10

**Fertilizers and biological nitrogen fixation as sources of plant nutrients: Perspectives for future agriculture**
O.C. Bøckman 11–14

**Isolation of endophytic diazotrophic bacteria from wetland rice**
W.L. Barraquio, L. Revilla and J.K. Ladha 15–24

**Isolation of endophytic bacteria from rice and assessment of their potential for supplying rice with biologically fixed nitrogen**
J.R. Stoltzfus, R. So, P.P. Malarvithi, J.K. Ladha and F.J. de Bruijn 25–36

**Association of nitrogen-fixing, plant-growth-promoting rhizobacteria (PGPR) with kallar grass and rice**
K.A. Malik, R. Bilal, S. Mehnaz, G. Rasul, M.S. Mirza and S. Ali 37–44

**Occurrence, physiological and molecular analysis of endophytic diazotrophic bacteria in gramineous energy plants**
G. Kirchhof, V.M. Reis, J.I. Baldani, B. Eckert, J. Döbereiner and A. Hartmann 45–55

***Azoarcus* spp. and their interactions with grass roots**
B. Reinhold-Hurek and T. Hurek 57–64

**Biological nitrogen fixation in non-leguminous field crops: Facilitating the evolution of an effective association between *Azospirillum* and wheat**
I.R. Kennedy, L.L. Pereg-Gerk, C. Wood, R. Deaker, K. Gilchrist and S. Katupitiya 65–79

**Rhizobial communication with rice roots: Induction of phenotypic changes, mode of invasion and extent of colonization**
P.M. Reddy, J.K. Ladha, R.B. So, R.J. Hernandez, M.C. Ramos, O.R. Angeles, F.B. Dazzo and F.J. de Bruijn 81–98

**Natural endophytic association between *Rhizobium leguminosarum* bv. *trifolii* and rice roots and assessment of its potential to promote rice growth**
Y.G. Yanni, R.Y. Rizk, V. Corich, A. Squartini, K. Ninke, S. Philip-Hollingsworth, G. Orgambide, F. de Bruijn, J. Stoltzfus, D. Buckley, T.M. Schmidt, P.F. Mateos, J.K. Ladha and F.B. Dazzo 99–114

**Interactions of rhizobia with rice and wheat**
G. Webster, C. Gough, J. Vasse, C.A. Batchelor, K.J. O'Callaghan, S.L. Kothari, M.R. Davey, J. Dénarié and E.C. Cocking 115–122

**Interactions between bacterial diazotrophs and non-legume dicots: *Arabidopsis thaliana* as a model plant**
C. Gough, J. Vasse, C. Galera, G. Webster, E. Cocking and J. Dénarié 123–130

**Root morphogenesis in legumes and cereals and the effect of bacterial inoculation on root development**
B.G. Rolfe, M.A. Djordjevic, J.J. Weinman, U. Mathesius, C. Pittock, E. Gärtner, K.M. Ride, Z. Dong, M. McCully and J. McIver 131–144

**Strategies for increased ammonium production in free-living or plant associated nitrogen fixing bacteria**
R. Colnaghi, A. Green, L. He, P. Rudnick and C. Kennedy 145–154

**Genetics of *Azospirillum brasilense* with respect to ammonium transport, sugar uptake, and chemotaxis**
A. Van Dommelen, E. Van Bastelaere, V. Keijers and J. Vanderleyden 155–160

**Chitin recognition in rice and legumes**
G. Stacey and N. Shibuya 161–169

**The role of phytohormones in plant-microbe symbioses**
A.M. Hirsch, Y. Fang, S. Asad and Y. Kapulnik 171–184

**The impact of molecular systematics on hypotheses for the evolution of root nodule symbioses and implications for expanding symbioses to new host plant genera**
S.M. Swensen and B.C. Mullin 185–192

***Nif* gene transfer and expression in chloroplasts: Prospects and problems**
R. Dixon, Q. Cheng, G.-F. Shen, A. Day and M. Dowson-Day 193–203

**Enhancing biological nitrogen fixation: An appraisal of current and alternative technologies for N input into plants**
S. Shantharam and A.K. Mattoo 205–216

**Author index** 217

**Instructions to authors** 219–221
